*IO12. Taking into consideration all you have learned about R during the interview, rate R's psychological, social and occupational functioning in the worst months of the past 12 months on the following scale. Consider psychological, social, and occupational functioning on a hypothetical continuum of mental health-illness. Do not include impairment in functioning due to physical or environmental limitations.

USE ANY NUMBER BETWEEN 0 AND 100

- 91 - 100 Superior functioning in a wide range of activities, life's problems never seem to get out of hand, is sought out by others because of his or her many positive qualities. No symptoms.
- 81 - 90 Absent or minimal symptoms of mental problems (e.g., mild anxiety before an exam), good functioning in all areas, interested and involved in a wide range of activities, socially effective, generally satisfied with life, no more than everyday problems or concerns (e.g., an occasional argument with family members).
- 71 - 80 If symptoms of mental disorder are present, they are transient and expectable reactions to psychosocial stressors (e.g., difficulty concentrating after family argument); no more than slight impairment in social, occupational, or school functioning (e.g., temporarily falling behind in schoolwork).
- 61 - 70 Some mild symptoms (e.g., depressed mood or mild insomnia) **OR** some difficulty in social, occupational, or school functioning (e.g., occasional truancy, or theft within the household) but generally functioning pretty well, has some meaningful interpersonal relationships
- 51 - 60 Moderate symptoms (e.g., occasional panic attacks) **OR** moderate difficulty in social, occupational, or school functioning (e.g., few friends, conflicts with peers or co-workers)
- 41 - 50 Serious symptoms (e.g., suicidal ideation, severe obsessional rituals, frequent shoplifting) **OR** any serious impairment in social, occupational, or school functioning (e.g., no friends, unable to keep a job).
- 31 - 40 Some impairment in reality testing or communication (e.g., speech is at times illogical, obscure, or irrelevant) **OR** major impairment in several areas, such as work or school, family relations, judgment, thinking, or mood (e.g., depressed man avoids friends, neglects family, or mood and is unable to work; child frequently beats up younger children, is defiant at home, and is failing at school).
- 21 - 30 Behavior is considerably influenced by delusions or hallucinations **OR** serious impairment in communication or judgement (e.g., sometimes incoherent, acts grossly inappropriately, suicidal preoccupation) **OR** inability to function in almost all areas (e.g., stays in bed all day; no job, home, or friends).
- 11 - 20 Some danger of hurting self or others (e.g., suicide attempts without clear expectation of death; frequently violent) **OR** occasionally fails to maintain minimal personal hygiene (e.g., odiferous) **OR** gross impairment in communication (e.g., largely incoherent or mute).
- 1 - 10 Persistent danger of severely hurting self or others (e.g., recurrent violence) **OR** persistent inability to maintain minimal personal hygiene **OR** serious suicidal act with clear expectation of death.
- 0 Unconscious
