INTERVIEWER TRAINING NOTES:

1. The General Interviewer Training (GIT) procedures for nondirective probing outlined in the GIT Training Manual of the Survey Research Center at the University of Michigan are the preferred GIT procedures to be followed in administering the K6. As GIT procedures vary across survey organizations, those used by the organization that carries out the survey should be used if a professional survey organization is administering the questions.

2. All bolded words in questions should be emphasized by voice inflection.

3. All parenthetical phrases in questions are optional.
4. "IF NEC" means "if necessary." The interviewer should prompt R with the response categories, using the truncated wording when specified, until R has learned them well enough to respond without prompting.

5. "IF VOL" means "if volunteered." If the respondent volunteers one of the specified responses, that response should be recorded without additional probing. The interviewer's response to other responses that are not included among the pre-specified responses (e.g., a response of "quite a bit of the time") should be handled following the GIT procedures specified for the survey. In most cases, GIT will call for repeating the response options once and coding the response as a refusal with a marginal note describing the exact response if the respondent continues to give a response other than those that are pre-specified.
