We don’t mean an expected reaction to something that was fun or exciting, but an episode when you were really different from usual in terms of your reactions to things. Please carefully read the following description of these episodes:

I. These episodes usually last between several days and several weeks. During these episodes, people feel one or more of the following experiences:

- Much happier, in a much better mood, or much more excitable than usual
- Much more self-confident or optimistic than usual
- Or much more irritable, grumpy, or quick-tempered than usual

II. During these episodes, people often are:
- Much more energetic, active, or hyper than usual
- Much more talkative, open, or outgoing than usual
- Or much more productive or engaged than usual in work, school, or other activities

III. People sometimes do things that are unusual for them during these episodes, such as one or more of the following:

- Spending too much money on things they don’t need
- Getting into relationships they would not usually get into
- Doing other things they would normally be too worried or embarrassed to do

NOTE: In the original World Mental Health College Student Survey, Question E33 asked: "About how many days out of 365 in the past year did you have an episode of this sort?" This question was edited in the current version of the survey to instead ask about the number of months in the past year. These need to be converted to the same metric when doing analysis.

E33. About how many months in the past 12 did you have an episode of this sort?

   [DROPDOWN LIST] 0, 1, ..., 11, 12

E34. Did you ever in your life have repeated attacks of anger when all of a sudden you lost control and either broke or smashed something, hit or tried to hurt someone, or threatened someone?

   ○ Yes
   ○ No

CKPT. E35.

2. ALL OTHERS GO TO E36

E35. About how many months in the past 12 did you have one or more of these attacks?

   [DROPDOWN LIST] 0, 1, ..., 11, 12

E36. Did you ever in your life have times lasting 1 month or longer after an extremely stressful experience when you had frequent upsetting memories or dreams, felt jumpy, felt emotionally distant or depressed, and had trouble sleeping or concentrating?

   ○ Yes
   ○ No

CKPT. E37.
1. E36 = "YES," GO TO E37
2. ALL OTHERS GO TO E38

E37. About how many months in the past 12 did you have reactions like these to any extremely stressful experience?

   [DROPDOWN LIST] 0, 1, ..., 11, 12
E38. Did you ever have a time in your life when you were much more fearful, anxious, or shy than other people about being in social situations (e.g., meeting new people, attending a party, eating in public, talking to people in authority, speaking up in class)?

☐ Yes
☐ No

CKPT.E39.
1. E38 = “YES,” GO TO E39
2. ALL OTHERS GO TO E42

E39. How often do you try to avoid these social situations?

☐ All or almost all the time
☐ Most of the time
☐ Some of the time
☐ A little of the time
☐ None of the time

E40. How much does your fear, anxiety, or avoidance of social situations ever interfere with your life?

☐ Extremely
☐ A lot
☐ Some
☐ A little
☐ Not at all

E41. About how many months in the past 12 were you much more fearful, anxious, or shy than other people about being in social situations?

[DROPDOWN LIST] 0, 1, ..., 11, 12

E42. Did you ever in your life have times lasting 3 months or longer when you had eating binges at least once a week; that is, your eating was out of control and you ate a very large amount of food over a short period of time (2 hours or less)?

☐ Yes
☐ No

CKPT.E43.
1. E42 = "YES," GO TO E43
2. ALL OTHERS GO TO E44

E43. About how many months in the past 12 did you have eating binges?

[DROPDOWN LIST] 0, 1, ..., 11, 12

E44. Did you ever in your life have times lasting 3 months or longer when you made yourself vomit or took laxatives or did other things to avoid gaining weight after binge eating?
