

Fernando Navarro-Mateu

Head, Mental Health Research and Teaching Unit. General Vice Direction of Mental Health Services. Health Service of Murcia. Ministry of Health, Region of Murcia (Spain). Medical Doctor (MD) (1990). Specialist in Psychiatry (1995). Doctor in Medicine (PhD) (1999). Master in "Design and Statistics in Health Science" in Universitat Autònoma de Barcelona (UAB) (2001-2004) and Master in "Medical and Clinical Management" in UNED and I.C.III (2004-06). Head of the Mental Health Research and Teaching Unit of the Mental Health Services in Murcia (Spain) since 2001. Under the Knowledge Management paradigm, Dr. Navarro-Mateu has focused in the integrated development of Continuing Healthcare Education, training of new mental health specialists and research. He has also coordinated the Mental Health Continuing Education Plans for more than a decade to further develop mental health professionals in Murcia. The training programs of new mental health specialists (psychiatrists, clinical psychologists and mental health nurses) have been developed under an interprofessional education model to promote interaction between all three specialities. His teaching unit has been the first in Spain to incorporate recent educational experiences in postgraduate education from a multiprofessional perspective, as Problem Based Learning (PBL). He has had a longterm interest in the promotion of Evidence Based Mental Health. Currently, he is the Principal Investigator (PI) of a multi-institutional collaborative research project focusing on a population based mental health survey. The institutions included the following: Mental Health Service in Murcia, Department of Epidemiology of the Murcia Reginal Health Authority (www.murciasalud.es/epidemiologia), Teaching and Health Research Foundation (Fundación para la Formación e Investigación Sanitaria, FFIS) in Murcia (www.ffis.es), Institute of Neurosciences of Alicante (www.salvadormartinezlab.com), the Municipal Institute for Medical Research (IMIM-Hospital del Mar) of Barcelona (<http://www.imim.es/>). He is a member of the CIBER-Epidemiology and Public Health (CIBER-ESP) network and is an active member of several scientific and professional organizations in the field of psychiatry and public health.
