

Dr Tim Slade is a Senior Research Fellow and co-director of the Psychiatric Epidemiology Research Program at the National Drug and Alcohol Research Centre (NDARC). He completed a Bachelor of Science (Psychology) degree at the University of New South Wales and went on to complete his PhD in the School of Psychiatry at the University of New South Wales. Since commencing his current role at NDARC he has greatly expanded his research in the intertwined areas of psychiatric classification and epidemiology. For the past ten years Dr Slade has developed a diverse program of research that has led to demonstrable changes in the way mental and substance use disorders are classified. In addition to his classification research Dr Slade led the development of the 2007 National Survey of Mental Health and Wellbeing (NSMHWB), the largest life-course epidemiological survey of mental and substance use disorders in Australia. In recent years Dr Slade has been developing a role as an academic biostatistician.
